

Claims

1. An arrangement with a number of modifiable settings, at least some of which are stored as individual values in a memory and are available as preset values to a user, characterized in that a telephone keyboard is provided, that at least a part of the memory range is such that it is used exclusively for recording and storing telephone numbers and which is addressable via the keyboard, that at least some of the individual values are stored as telephone numbers in the memory areas.
2. An arrangement with a number of modifiable settings, characterized in that a telephone keyboard and a memory are provided, that at least a part of the memory range is such that it is used exclusively to record and store telephone numbers and is addressable via the keyboard, that individual values which correspond to determined pre-settings for the arrangement are stored as telephone numbers in the memory areas.
3. An arrangement as claimed in claim 1 or claim 2, characterized in that a unit is provided which differentiates between stored telephone numbers and stored individual values, and brings up the respective settings after individual values have been determined.
4. An arrangement as claimed in claim 3, characterized in that the unit is an evaluation device which ascertains the difference by means of reserved concepts.
5. An arrangement as claimed in claim 1, characterized in that determined areas of the memory are reserved for individual values.
6. An arrangement as claimed in one of claims 1 to 5, characterized in that when the arrangement containing the stored individual values is connected to another arrangement, the stored individual values are transferred to the other arrangement to bring about the individual settings connected with the latter.
